

At the beginning of yourself

Detail from the sculpture "Trunckscape" by Petter Hepsøe.

Image of Orion Nebula, taken by Erik Mikkelsen through the school's telescope

Breathing Exercise

If you go out far enough
you`ll see the sun as just a spark
in a dying fire
if you go out far enough.

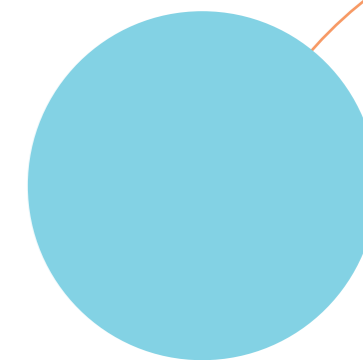

If you go out far enough
you`ll see the whole wheel of the Milky Way
turning on the roads of the night
if you go out far enough.

If you go out far enough
you`ll see the Universe itself,
billions of light-years, all of time
as just a glimmer, as lonely and distant
as a star on a June night.

And yet, my friend, if you go out far enough
you`ll just be at the beginning
of yourself.

*Rolf Jacobsen (1907–1994)
is considered one of Norway's greatest poets.
He lived in Hamar from 1961.*

*Translated by Olav Grinde,
Norwegian writer and artist.*

Our core values

Hamar Cathedral School (Hamar katedralskole) is popularly known as "Katta". It is a pun, a play with words, and the real meaning of the phrase is "the cat".

We would like you to participate in the term "We at Katta" by incorporating our values of respect and enthusiasm in the way you think and behave, both in and outside our school. If your behaviour and effort are characterized by these two values, you will help us creating the "We at Katta attitude".

Respect

At Katta we show respect and appreciation for each other. We accept that people are different and include everyone. By doing so, we demonstrate that we respect other people's dignity and integrity.

Enthusiasm

Enthusiasm is characterized by commitment and joy. Driven by enthusiasm everything is possible. We want everyone at school to experience a good learning environment identified by motivation, drive and enthusiasm.

Studies

Hamar Cathedral School offers a wide range of studies, both general studies and vocational courses. The vocational subjects are organized in different ways, but most of them are leading up to a craft certificate or a certificate of apprenticeship.

General university admissions certification

Specialisation in General Studies
for those who like theoretical subjects and are aimed at higher education. You choose specialization in languages, economics, social sciences and natural sciences.

on practical work, and you get university admissions certification after 3 years.
